To: Whom It May Concern

April 29<sup>th</sup>, 2004

Kaleiopu'u Elementary School started working with Lexia, Guided Reading, and A+LS in the fall of 2003. Currently our lab works with grades K-6, servicing 220 students nearly 5 days a week. The students' confidence has dramatically improved, as well as, their reading skills.

The WARE Group has consistently been helpful towards training, implementing, and updating our software. They went the extra mile to not just attend, but assist in presenting the software to staff and parents on a short notice.

Having students assessed to work on their individual needs helps students fill in the gaps to reach their potential. The school year has yet to end, but we see positive results already and look forward to more success in the future. With the success that we are seeing with the reading software, we believe we will see similar results when we implement the math software next fall.

Sincerely,

Laura Gabriel
