April 28th, 2004

I am writing to provide information about Waipahu Intermediate's experience with The WARE Group and The WIN 2000 computer-based programs.

At Waipahu Intermediate School, The WIN 2000 computerized system was started in October 2003, initially used in 7th and 8th grade English classes, as well in the 21st Century Grant – After School Instructional (ASIP) program.

Over our short period of implementation, students have shown improvement in reading comprehension scores, motivation to read, and are excited coming to class, knowing it is their turn to attend WIN 2000 Lab. The WIN 2000 programs offer a multi-sensory reading and comprehension strategy, that keeps student's focused, and the system provides instant feedback on student work.

While the program itself is excellent, it could not have been implemented without the knowledgeable and helpful staff found in The WARE Group. Aron Schweitzer of The WARE Group has been able to help me through various obstacles arising over the months. I can count on The WARE Group to answer my questions whether they are in the office on-Island or attending a conference on the Mainland.

If you have any further questions, please feel free to contact me at 808-675-0177 ext 313.

Sincerely,

Neil Battad
